ASTI Transportation Systems
Mr. Noah Jenkin
18 Blevins Drive
New Castle, DE 19720

July 30, 2008

Dear Mr. Jenkin,

I would like to compliment you and your staff at ASTI Transportation Systems, for the wonderful job you did in partnering with us to provide the Michigan Department of Transportation (MDOT) a temporary, portable, "Real Time Work Zone Information System" (RTWS). The system did exactly what MDOT wanted it to do with no major maintenance issues on our end.

Your queue detector system interfaced with our Portable Changeable Message Signs and your Computer Highway Informational Processing System (CHIPS) with absolutely no problems. You sent me the web link as soon as the system was deployed, and there it was on my laptop monitoring traffic on our project. Pretty slick. It was a pleasure working with you and your staff and I will look forward to further opportunities to partner with you again.

Sincerely,

A handwritten signature in black ink that reads "Michael Mooney".
